

Where comfort and peace of mind are more affordable than you think.

Rinker Inc. specializes in Fully Automatic Home Standby Generator Systems. We service all of Northeastern Pennsylvania and Sullivan County New York State. We sell, install, and service all major brands.

“ Thank you for a job well done. I look forward to moving into my home knowing its safe as a result of your efforts. The other workers on the job repeatedly made good remarks about your crew, especially Julio and Chris. Both the care they took in doing the job right and the way they conducted themselves were noted. ”

AUTOMATED HOME GENERATOR SYSTEMS

Stay Ahead of the Weather

In NEPA, we experience high winds, - thunderstorms, microbursts, snow, ice, hail, heat waves and more recently - tornadoes, even hurricanes! We are constantly at risk of power loss.

Keep Your Home (and Finances) Running Smoothly

When the power goes out, not only do we lose our lights and internet, we lose the refrigerator, freezer, sump pump, septic pumps and heat. This can result in flood damage, frozen pipes, mold, spoiled food, hotel stays and/or lost wages. All of these financial burdens can be avoided with a home generator.

We work hard to provide the best generator based on your individual needs, wants, and budget. We not only have the experience; we offer excellent equipment backed by the best warranties.

DUCTLESS HEATING AND COOLING SYSTEMS

Why go Ductless?

Year Round Comfort & Energy Savings

Zoned Comfort Solutions provide yearround comfort and are up to 40% more efficient than traditional systems. By adding Hyper Heat, your ductless unit will perform optimally at temperatures as low as minus 13 degrees! Not only will you save money in the summertime - you will save money all year round! Make sure your new home is 100% comfortable, 100% of the time.

More Flexibility

Because our systems focus on individual living spaces rather than treating every room the same, it's more customizable to your individual needs.

Fast and Clean Installation

A typical installation can be started and finished in as little as one day. Your home will not be tied up for weeks, and you will not lose precious space due to ductwork.

Whisper Quiet Operation

Our indoor units operate as low as 19dB(A), quieter than a human whisper. Outdoor units operate as low as 58 dB(A)- the level of a restaurant conversation or background music.

ELECTRICAL SERVICES

Residential

- ▶ New/Renovation Wiring
- ▶ Main Service/Installations/Upgrades
- ▶ Safety Inspections

- ▶ Troubleshooting & Repair
